# BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

| BLACK BORDERS
| IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
| FADED TEXT OR DRAWING
| BLURRED OR ILLEGIBLE TEXT OR DRAWING
| SKEWED/SLANTED IMAGES
| COLOR OR BLACK AND WHITE PHOTOGRAPHS
| GRAY SCALE DOCUMENTS
| LINES OR MARKS ON ORIGINAL DOCUMENT
| REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
| OTHER: \_\_\_\_\_\_

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.

Application/Control Number: 10/051,335 Page 2

Art Unit: 2124

### **DETAILED ACTION**

1. This action is in response to the preliminary amendment filed on 10/19/2001.

2. Claims 29-32 and 45-48 are pending.

# **Priority**

3. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification of in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Acknowledgment is made of applicant's claim for foreign priority under 35
 U.S.C. 119(a)-(d). The certified copies have been received on 06/03/1999.

# Information Disclosure Statement

5. An initialed and dated copy of Applicant's IDS form 1449 received on 04/07/2003 and 10/19/2001 is attached to the instant Office action.

The content of information disclosure statement received on 10/19/2001, the foreign patent document the abstract is only considered because the abstract is provided in English. For the full document consideration full English version is required.

# Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 2124

7. Claim 29 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claim is non-statutory because it recite components of generating instruction sequence from source code, representing functional descriptive material without a computer readable medium or computer implemented, program per se are not tangibly embodied. Claims 29-32 thus amounts to only abstract idea and are nonstatutory.

# Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

9. Claims 29-32 and 45-48 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,559,975 to Christie et al. (hereinafter called Christie).

### Per claim 29:

Christie disclose:

Application/Control Number: 10/051,335

Art Unit: 2124

Page 4

- A compiler that generates an instruction sequence from source code (col. 5, lines 11-12 "Instructions decoder 108 examines the instructions and determined the appropriate action"),
- the compiler generating a program counter relative value calculating instruction that is executed by a processor (col. 5, lines 9-10 "a fetch program counter value which I generated by instructions cache"), the program counter relative value calculating instruction being an instruction that performs a calculation using a first value and a program counter relative value and uses a result of the calculation to update the first value, the first value being one of
- (a)a value of a program counter stored in a register (col. 6, lines 11-12 "program counter value is also stored in a program counter register in register file 112"), and
- (b)the value stored in a program counter of the processor (Abstract, "A processor which includes a fetch program counter circuit and an execute program counter"),
- wherein upper bits of the first value indicate a memory address at which a processing packet is stored (col. 9, lines 46-49 "Byte queue... upon detecting... indicates the byte of the target and the new target address to decode program counter" and (col. 11, lines 3-5 "Incrementer 330 receives the upper 28 bits... provides an incremented decode PC value"), and lower bits of the first value of the program counter indicate a processing target instruction that is included in the processing packet (col. 9, lines 51-52 "program counter value... provided to branch section 135 as well as low order bits and carry bits of the decode program counter value for each dispatched ROP").

Application/Control Number: 10/051,335 Page 5

Art Unit: 2124

### Per claims 30 and 31:

Christie disclose:

wherein the processor includes a lower bit calculating unit and an upper bit calculating unit (col. 10, lines 11-15 "program counter generator circuit 242 includes... less significant portion program counter latch 306, more significant portion program counter generator circuit 308"),

- the program counter relative value calculating instruction having the lower bit calculating unit perform a lower bit calculation (col. 10, lines 60-61 "Less significant program counter generator circuit 310 provides the carry bits from each adder to carry selector 334") and the upper bit calculating unit perform an upper bit calculation (col. 10 and col. 11, lines 66-67 and 1 "More significant program counter latch 304 provides bits 4:31 of the next program counter value to more significant program counter generator circuit 308"),
- the lower bit calculation being an addition using lower bits of the first value and lower bits of the value of the program counter relative value (col. 11, lines 28-29 "allocate multiplexers 338 receive the lower order next program counter values (LPC)"), where a result of the lower bit calculation is set as the lower bits of the first value (col. 11, lines 21-23 "Multiplexer... selects one of four potential lower order next program counter values as bits 0:3") and any generated carry is sent to the upper bit calculating unit (col. 11, lines 30-31 "the carry values (CARRY) and provide these values to reorder buffer 114 for each ROP that is dispatched"), and

Art Unit: 2124

the upper bit calculation being an addition using upper bits of the first value (col. 12, lines 3-5 "Incrementer 330 receives the upper 28 bits of the present decode PC value... a value in which the upper 28 bits are incremented by one"), upper bits of the value of the program counter relative value and any carry received from the lower bit calculating unit (col. 11, lines 11-12 "Carry selector circuit 334 uses the carry bits from less significant portion program counter"), where a result of the upper bit calculation is set as the upper bits of the first value (col. 11, lines 14-17 "If the carry bit of the next ROP to be dispatched is active... then the incremented decode PC value is used for the upper 28 bits of the next decode PC value").

### Per claim 32:

# Christie disclose:

- wherein the processor includes an upper bit calculating unit (col. 10, lines 11-15 "program counter generator circuit 242 includes...more significant portion program counter generator circuit 308"),
- the program counter relative value calculating instruction having the upper bit calculating unit perform an upper bit calculation and setting lower bits of the program counter relative value as lower bits of the first value (col. 10 and col. 11, lines 66-67 and 1 "More significant program counter latch 304 provides bits 4:31 of the next program counter value to more significant program counter generator circuit 308"), and
- the upper bit calculation being an addition using upper bits of the first value (col. 12, lines 3-5 "Incrementer 330 receives the upper 28 bits of the present decode PC value... a

value in which the upper 28 bits are incremented by one") and upper bits of the value of the program counter relative value (col. 11, lines 11-12 "Carry selector circuit 334 uses the carry bits from less significant portion program counter"), where a result of the upper bit calculation is set as the upper bits of the first value (col. 11, lines 14-17 "If the carry bit of the next ROP to be dispatched is active... then the incremented decode PC value is used for the upper 28 bits of the next decode PC value").

Claims 45-48 are the computer program product claim corresponding to method claims 28-32 respectively, and rejected under the same rational set forth in connection with the rejection of claims 28-32 respectively, above.

Substantially as claimed.

# Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Satish S. Rampuria whose telephone number is 703-305-8891.

The examiner can normally be reached on 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Kakali Chaki** can be reached on **(703)** 305-9662. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
